

COVID-19 outbreaks in Australian residential aged care facilities

National snapshot

As at 8:00am on 16 April 2021 there are no active cases of COVID-19 related to aged care.

Table 1: Aged Care COVID-19 data as at 0800 on 16 April 2021¹

| | |
|--|---|
| Active outbreaks | 0 |
| Active resident cases | 0 |
| Active staff cases | 0 |
| Deaths | 678 |
| Total number of residential aged care facilities that have had an outbreak | 214 |
| Total number of outbreaks at residential aged care facilities | 221 |
| Number of residential aged care facilities with resolved outbreaks | 214 (221 outbreaks closed) ² |
| Number of residential aged care facilities with only one case (resident or staff member) of COVID-19 | 94 |
| Total resident cases | 2,029 |
| Recovered resident cases | 1,351 |
| Total staff cases | 2,227 |
| Recovered staff cases | 2,227 |

¹ These figures exclude transition care.

² Some residential aged care facilities have had more than one outbreak.

Analysis

Current situation in Australia

In Australia, a total of 29,469 cases of COVID-19 have been reported, including 155³ active cases and 910 deaths.

As at 8:00am 16 April 2021, there are no active cases of COVID-19 in a staff member in a Commonwealth funded aged care service.

As at 8:00am on 16 April 2021, there are no active cases in residential aged care recipients. The last new active case of COVID-19 in a residential aged care recipient was identified on 26 September 2020.

There have been no active cases of COVID-19 in aged care recipients since 28 October 2020.

Figure 1: Distribution of Australian residential aged care facilities by total number of cases of COVID-19 (includes staff and resident cases)

Of the 214 residential aged care facilities that have had a case(s) of COVID-19, 95 facilities (44 per cent) have had a single case of COVID-19.

³ *Classification of active cases varies by jurisdiction.

Figure 2: Number of daily reported COVID-19 cases in Australian residential aged care facilities overlaid with national locally acquired cases⁴.

International comparisons

During the COVID-19 pandemic, no country has been able to avoid outbreaks or deaths in residential aged care when there has been widespread community transmission.

The Australian death rate is 0.37 per cent (3.7 in 1,000) against the total number of residential aged care beds across the country.

By comparison, Canada has experienced more than 22 times the number of deaths in care homes; than Australia as at 16 April 2021.

- As at 16 April 2021, Canada had experienced 23,289 deaths – 15,025 (or 65 per cent) in care homes.

Influenza cases and influenza-associated deaths

Sadly influenza kills many elderly Australians each year many of whom live in aged care facilities.

Influenza is an important issue in residential care. Residents, particularly the elderly, are often vulnerable to influenza due to co-morbidities and/or advanced age, and the environment of communal living facilitates the spread of respiratory agents⁵.

Notification data for influenza by accommodation setting is not reported to the National Notifiable Disease Surveillance System (NNDSS).

⁴ National daily cases sourced from NNDSS data as at 15 April 2021 and are filtered to locally acquired cases. Case numbers reflect the date of reporting which may differ to diagnosis date. Residential aged care facility staff and resident data sourced from the Department of Health Aged Care COVID Liaison Team. Totals reflect the date of case report and may be affected by delayed reporting.

⁵ 'RACF' refers to cases in residential aged care facilities (staff and residents)

⁵ Reference: Guidelines for the Prevention, Control and Public Health Management of Influenza Outbreaks in Residential Care Facilities in Australia

The following data represents persons aged 65 and over for all accommodation settings. In those aged over 65 years, in the period 1 January to 31 December for each year*:

- The 2017 influenza calendar year data recorded the highest levels of influenza activity since 2009 swine flu pandemic with over 1,064 older Australians dying from influenza.
- In 2018, 115 older Australians died from influenza.
- In 2019, 839 older Australians died from influenza.
- In 2020, 28 older Australians died from influenza.

* The data provided were extracted from the NNDSS on 20 January 2021. NNDSS data is analysed and reported based on diagnosis date, which is the true onset date of a case if known, otherwise it is the earliest of the specimen date, the notification date or the notification received date. Due to the dynamic nature of the NNDSS, data in this extract is subject to retrospective revision and may vary from data reported in published NNDSS reports and reports of notification data by states and territories.

†No one single system, including notification data, provides the full picture on influenza, because influenza is a common disease and its presenting symptoms are non-specific, resulting in an under-representation of activity in national systems. The epidemiology of influenza is informed by a number of different systems, of which only one, national notification data, is presented here. Elements of the COVID-19 response, including social distancing measures, diversion of testing resources to COVID-19 diagnosis and resource implications of response activities, are affecting the number of notifiable disease cases notified to the NNDSS. Case numbers presented may not reflect actual notification trends. These effects may differ by jurisdiction

§Year on year comparisons of deaths in notified cases of influenza may not be reliable due to retrospective revision, variation across jurisdictions in methodology, representativeness and timeliness of death data. Further, cases' outcome of infection may be retrospectively updated to "died" at a later point in the year.

Workforce in active residential aged care outbreaks

As part of the aged care response, significant surge workforce assistance has been provided including by both State and National Aged Care Emergency Response (NACER) teams, with many workers deployed from interstate.

Table 2: Workforce resources supplied to residential aged care facilities

| Agency | Resources Supplied (as at 11 April 2021) |
|---|--|
| State and NACER (National Aged Care Emergency Response) Teams | Tasmanian Government: 7 clinical and 2 support staff. Western Australian Government: 19 clinical personnel and 4 support staff. South Australian Government: 18 clinical personnel and 4 support staff. 12 NACER teams (70 personnel) have been deployed. The deployment of State and NACER teams is now complete. |
| Recruitment, Consulting, and Staffing Association (RCSA) | Staff supplied to fill 24,762 shifts. |
| Healthcare Australia | Staff supplied filled 5,249 shifts for workforce surge and 2,295 shifts for NACER teams. |
| Mable | Supplied 130 staff to fill 2,711 shifts. |

| Agency | Resources Supplied (as at 11 April 2021) |
|--|--|
| Aspen Medical | Supplied 270 staff to fill 751 roles including clinical first responders. |
| Health X | Supplied 43 staff to fill 1,832 shifts. |
| Torrens Health | Supplied 1,248 shifts in surge workforce roles and 1,270 shifts as Residential Aged Care visitation Assistants (RACVAs). |
| Residential Aged Care Visitation Assistant (RACVA) | RACVAs completed 1,205 shifts. |

Provision of personal protective equipment (PPE)

A range of resources and online training on the use of PPE is available on the Department's website for aged care workers.

Since March 2020, the Commonwealth Government has been working with state and territory governments to ensure aged care facilities have sufficient PPE. PPE is dispatched both directly from the National Medical Stockpile (NMS) and by jurisdictions on the NMS' behalf, depending on the specific circumstances.

Over half a billion masks and approximately 53 million gowns, 164 million gloves, and 44 million goggles/face shields have been ordered for staggered delivery into the NMS through to 2021.

As at 13 April 2021, the NMS has provided aged care facilities with approximately:

- 20 million masks
- 5 million gowns
- 12 million gloves
- 4 million goggles and face shields
- 90,000 bottles of hand sanitiser

The NMS remains well positioned to respond rapidly to critical shortages of PPE and other medical supplies anywhere in Australia. This includes a series of bulk dispatches of personal protective equipment (PPE) intended to avert any potential critical supply shortages, as well as urgent deployments to organisations and individuals at risk of exposure to COVID-19.

Testing of aged care residents and staff

The Australian Government has engaged Sonic Healthcare to provide a dedicated pathology service for the testing of suspected cases of COVID-19 in residential aged care facilities. The service is intended to supplement existing public health pathology services in aged care through the provision of services from the private sector as required. Testing regimens for residents and staff at aged care facilities that experience a COVID-19 outbreak is based on advice from the relevant Public Health Unit. As at 6 April 2021, Sonic Healthcare has conducted 347,349 COVID-19 tests at 2,394 unique residential aged care facilities nationally.

In response to the recent outbreak, Sonic offered targeted asymptomatic testing at a number of facilities within the five greater Brisbane Local Government Areas.

From 0600 hrs 15 April 2021, the restrictions in place in Queensland aged care facilities, in response to cases of COVID-19 community transmission, are no longer in force.

Vaccination in Residential Aged Care Facilities

The Australian Government has identified consumers and staff in RACFs as being high priority targets for Phase 1 of its vaccine rollout. They will be among the first to receive the vaccine (along with residents of disability facilities).

As at 16 April 2021, over 164,600 COVID-19 vaccine doses have been delivered in aged care facilities and disability accommodation. As at 16 April 2021, 1,261 aged care facilities across Australia have received the COVID-19 vaccine and of these, 659 have received a second dose visit.

Infection control and audits

The Aged Care Quality and Safety Commission (Commission) has conducted an infection control monitoring (ICM) program in all Australian jurisdictions, working in partnership with local health authorities. This program was in addition to the Commission's usual assessment and auditing program, and included spot checks to residential aged care services, without an outbreak, to check compliance with PPE and infection control arrangements. The purpose of the visit was to observe infection control practices, to ensure that staff, management and visitors were adhering to safe personal protective equipment protocols and to safe infection control arrangements as required under the quality standards.

Between 1 March 2020 and 8 April 2021, the Commission undertook 3,601 unannounced visits and announced/short notice visits nationally. During this period 2,964 visits relating to infection control were made nationally.

The Commission is now transitioning to a COVID-normal regulatory response. The ICM spot check visits will no longer be undertaken as separate activities and will be folded into usual regulatory operations from April 2021 onwards. The Commission, however, remains ready to stand up ICM spot checks as required and retains the capability to respond rapidly to identified risks to aged care services presented by cases of community transmission in any part of Australia.

All residential aged care facilities are required to engage an onsite clinical lead to provide leadership and increase capacity in relation to infection prevention and control. The Australian Government is providing a second payment of the COVID-19 supplement to assist facilities in meeting the additional costs of preparing for and responding to COVID-19.

In addition, under the Commonwealth-State Plan to boost aged care preparedness, states and territories are complementing the activity being undertaken by the Commission through additional site visits by state health services at the local level, which includes work relating to infection prevention and control (see Table 3 below). These visits are strengthening state health service relationships with local aged care services as part of the standing up of joint health aged care emergency response centres in each jurisdiction.

The Australian Government is working collaboratively with the states and territories to further bolster infection prevention and control through high quality face-to-face training in the aged care sector. In particular, the Government has committed \$57.8 million to fund states and territories to deploy accredited infection prevention and control (IPC) experts into residential aged care facilities to provide training, and assist with the refinement of outbreak management plans where needed.

Table 3: Total Quality Assessment and Monitoring Activities with residential services (including IPC), by type and month 1 April 2020 – to 15 April 2021

| Regulatory Activities | Apr-20 | May-20 | Jun-20 | Jul-20 | Aug-20 | Sep-20 | Oct-20 | Nov-20 | Dec-20 | Jan-21 | Feb-21 | Mar-21 | Apr-21 | Total |
|----------------------------|------------|------------|------------|--------------|--------------|--------------|------------|------------|--------------|------------|------------|------------|------------|---------------|
| Site visits | 12 | 94 | 115 | 132 | 329 | 580 | 485 | 329 | 362 | 292 | 258 | 296 | 77 | 3,361 |
| Non-site activities | 419 | 81 | 73 | 1,406 | 2,790 | 436 | 339 | 465 | 1,100 | 423 | 324 | 218 | 31 | 8,105 |
| Total activities | 431 | 175 | 188 | 1,538 | 3,119 | 1,016 | 824 | 794 | 1,462 | 715 | 582 | 514 | 108 | 11,466 |

Appendix 1: National residential aged care services with two or more positive COVID-19 cases

Victorian data is from the Public Health Events Surveillance System (PHESS). Case data for residential aged care facilities in all states except Victoria is collected by the Commonwealth Government.

| No | State | Residential Aged Care Facility | Total Cases | Resident total | Resident resolved | Staff total | Staff Resolved | Resident deaths ⁶ | Resolved / Active |
|----|-------|--------------------------------------|-------------|----------------|-------------------|-------------|----------------|------------------------------|-------------------|
| 1 | NSW | Dorothy Henderson Lodge, BaptistCare | 22 | 17 | 11 | 5 | 5 | 6 | R |
