The Panel noted the proposed product is considered to be equivalent to products currently available at the benchmark price in subgroup 2(b). The Panel also noted that no comparative data was provided.

#### *Economic Analysis*

Not undertaken.

#### *Financial Analysis*

Listing of this product is recommended on a cost-minimisation basis compared to products currently listed in subgroup 2(b) of the SAS Schedule. It is therefore unlikely that there would be any budgetary impact for the SAS as a consequence of listing this product.

The SPAP recommended that the Omnigon Eakin Dot One Piece Drainable Convex Baseplate, including 13 variants be listed in subgroup 2(b) of the SAS Schedule at the unit price of \$6.373, with a maximum monthly quantity of 30 units.

### 7. Context for Decision

The SPAP helps decide whether stoma products should be subsidised and, if so, the conditions of their subsidisation in Australia. It considers submissions in this context. A SPAP decision not to recommend listing or changes to a listing does not represent a final SPAP view about the merits of a particular stoma product. A company can resubmit to the SPAP following a decision not to recommend listing or changes to a listing. The SPAP is an advisory committee and as such its recommendations are non-binding on Government. All SPAP recommendations are subject to Cabinet/Ministerial approval.

### 8. Applicant's Comment

Omnigon agrees with the SPAP's recommendation.
