# PUBLIC SUMMARY DOCUMENT

**Product:** Omnigon Flexima Active **Applicant:** Omnigon **Date of Meeting:** 20 April 2021

### 1. Proposed Variation on the Stoma Appliance Scheme

The applicant, Omnigon, requested the addition of seven variants to the current listing of the Omnigon Flexima Active (SAS Code 80021P) in subgroup 1(b), of the Stoma Appliance Scheme (the Scheme) Schedule. The product, including nine variants, is currently listed at a unit price of \$2.735, with a maximum annual quantity of 90 units.

### 2. Variants to be added

The applicant requested the addition of seven variants to the existing product range.

### 3. Background

This product was first listed on the SAS Schedule in 1 May 2015

### 4. Clinical Place for the Product

Not Applicable.

### Financial Analysis

The addition of seven variants to the existing product range is recommended on a costminimisation basis compared to products currently listed in subgroup 1(b) of the SAS Schedule. It is therefore, unlikely that there would be any budgetary impact for the SAS as a consequence of listing one variant to the current product range.

### 5. SPAP Recommendation

The Panel recommended the addition of seven variants to the current product range for Omnigon Flexima Active (SAS Code 80021P) listed in subgroup 1(b), of the SAS Schedule at the unit price of \$2.735, with a maximum monthly quantity of 90 units.

### 6. Context for Decision

The Panel helps decide whether stoma products should be subsidised and, if so, the conditions of their subsidisation in Australia. It considers submissions in this context. A Panel decision not to recommend listing or changes to a listing does not represent a final Panel view about the merits of a particular stoma product. A company can resubmit to the Panel following a decision not to recommend listing or changes to a listing. The Panel is an advisory committee and as such its recommendations are non-binding on Government. All Panel recommendations are subject to Cabinet/Ministerial approval.

## 7. Applicant's Comment

Omnigon agrees with the SPAP's recommendation.
