Product Code	Description
412200	Deodoriser drops, 15ml bottle.

3. Background

This product was first listed on the SAS Schedule in 1 April 2011.

4. Clinical Place for the Product

Financial Analysis

The deletion of the current product is recommended. It is unlikely that there would be any budgetary impact for the SAS as a consequence of deleting this product.

5. Panel Recommendation

The Panel recommended the deletion of Smith & Nephew Banish (SAS Code 3514Y) in subgroup 9(g) of the SAS Schedule at the unit price of \$3.97, with a maximum monthly quantity of two units.

The Panel also noted that Smith & Nephew is to advise Stoma Associations, ostomates, Stomal Therapy Nurses and ACSA of the deletion. A period of approximately six months from the date of the Panel's recommendation (20 April 2021) should be given to allow users of the product to seek a suitable alternative and to enable Stoma Associations to manage their stock levels.

6. Context for Decision

The Panel helps decide whether stoma products should be subsidised and, if so, the conditions of their subsidisation in Australia. It considers submissions in this context. A Panel decision not to recommend listing or changes to a listing does not represent a final Panel view about the merits of a particular stoma product. A company can resubmit to the Panel following a decision not to recommend listing or changes to a listing. The Panel is an advisory committee and as such its recommendations are non-binding on Government. All Panel recommendations are subject to Cabinet/Ministerial approval.

7. Applicant's Comment

Smith & Nephew agree to the SPAP's recommendation.
