Australia's COVID-19
Vaccine Roadmap

Cumulative doses administered (25 Jul): 11,211,447

The x-axis is truncated at the length of Australia's vaccination program. Countries with intermittent reporting have had their doses per 100 imputed to Australia's current stage of rollout. Israel excluded as it is beyond scale of the graph.

About this data

- Distributed – Total doses delivered to sites. Based on logistics provider data. This figure includes doses allocated for administration in the coming week.
- Available – total doses that could have been administered to date, less doses re-distributed from States & Territories to Primary Care or Aged Care & Disability (i.e. does not include those deliveries recently received, and intended for use in the coming week).
- Administered – Doses administered as at 25 July 2021.
- The dose utilisation is calculated based on the total doses administered and a small % wastage in line with international standards in relation to total available doses.
- For Aged Care & Disability, the doses available for administration is for the full period (Weeks 1-22).
- Aged Care & Disability utilisation is not provided as the in-reach rollout is demand-based, with vaccines ordered based on resident numbers.
