Data as at 01 August

Doses at equivalent stages of rollout (Day 160)

Data as at: 01 Aug 2021

Cumulative doses administered (01 Aug): 12,393,893

The x-axis is truncated at the length of Australia's vaccination program. Countries with intermittent reporting have had their doses per 100 imputed to Australia's current stage of rollout. Israel excluded as it is beyond scale of the graph.

About this data

- Distributed Total doses delivered to sites. Based on logistics provider data. This figure includes doses allocated for administration in the coming week.
- Available total doses that could have been administered to date, less doses re-distributed from States & Territories to Primary Care or Aged Care & Disability (i.e. does not include those deliveries recently received, and intended for use in the coming week).
- Administered Doses administered as at 1 August 2021.
- The dose utilisation is calculated based on the total doses administered and a small % wastage in line with international standards in relation to total available doses.
- For Aged Care & Disability, the doses available for administration is for the full period (Weeks 1-23).
- Aged Care & Disability utilisation is not provided as the in-reach rollout is demand-based, with vaccines ordered based on resident numbers.
