Attachments: AMTA Letter to Brendan Murphy Dept of Health Nov 19.pdf; Draft CMO Statement on 5G and Health.DOCX

Hi s22 ,

Thanks for this. Brendan has reviewed and is fine with the CMO Statement.

Can I you please confirm ARPANSA has reviewed and are comfortable with it?

Given there might be media interest, we were thinking we would aim to publish after Brendan is back from leave in mid-January if that is ok with you?

In the meantime, could you please:

- Run the CMO statement by the Office and confirm they're comfortable with Brendan doing the statement and the proposed publishing date
- Start working on talking points to support Brendan and the MO around the time of publishing

Have you been in touch with AMTA? If not, Brendan wanted me to write back to them providing them a copy as a courtesy and letting them know we plan to publish mid-Jan, pending MO consideration.

Welcome your thoughts.

Kind regards,

s22

Hi s22 ,

As discussed, please find attached the FAS cleared draft statement for Brendan on 5G and health.

I have also reattached the original letter from AMTA for you as background.

Happy to discuss.

Cheers,

s22

Of course.
There is no hurry
Would be good to join together the processes
Perhaps if team can get back to AMTA and outline a strategy

Hi Brendan

Yes we can look into this for you – however I wanted to highlight for you that we understand that the EME (5G) proposal to be brought forward by the Department of Communications and the Arts (DoCA) is likely to be considered shortly and, if agreed, could be announced as early as December. In light of this I have sought advice from Sam Devlin and Chris Gattenby as to the interest for a joint media announcement from either Minister Hunt or Minister Colbeck with Minister Fletcher. I think we could hold off on a decision on your statement until I hear back from the office, if that is okay with you?

I am happy to consider making a CMO statement on this. It would be useful
Can the team liaise with them and ARPANSA and set something up, unless anyone thinks it is a bad idea.

Dear Professor Murphy,

Please find attached a letter and fact sheets in relation to latest generation mobile networks – 5G from the CEO of the Australian Mobile Telecommunications Association.

Kind regards,

Brendan.murphy@health.gov.au

Dear Brendan,

As you are no doubt aware there is a great deal of misinformation in the public domain regarding health and safety implications of the 5th generation of mobile technology (5G).

AMTA has developed a range of material to address the main themes (see attached) and ARPANSA have also been very active in working to ensure the facts as reflected in body of science are present in the public discourse. In addition, AMTA understands the Department of Communications is planning to release some fact sheet style information and the ACMA has also produced a fact sheet on small cells.

AMTA also held a drop-in session in Parliament House with ARPANSA and the ACMA on Sept 16 to present a range of information and provide some demonstrations of EME measurements etc. This session will be repeated on November 25th in the Mural Hall of Parliament House – see attached invitation. You and any of your staff are most welcome to attend.

While ARPANSA continue to do a good job in adding their perspectives, AMTA also sees a role for the Health Department to engage in this conversation. Indeed, most recently this has occurred in NZ with some strong statements made by their Health Dept in response to the misinformation being circulated in their market.

I would welcome the opportunity to discuss this issue with you as needed, otherwise our request is a simple one – that your voice is added to the conversation as a reflection of the Dept. of Health's perspective on this issue.

Thank you in advance for your consideration.

Yours sincerely

A handwritten signature in dark ink, appearing to read 'Althaus', is written over a large, diagonal, semi-transparent watermark that reads 'THIS DOCUMENT HAS BEEN RELEASED UNDER THE FREEDOM OF INFORMATION ACT 1982 BY THE DEPARTMENT OF HEALTH'.

Chris Althaus

Invitation to Nov 25th Parliament House 5G / EME information session

Statement from Australia's Chief Medical Officer, Professor Brendan Murphy, about the safety of the new generation 5G mobile phone network

The community should be reassured that 5G technology is safe.

There is no evidence telecommunication technologies, such as 5G, cause adverse health impacts.

This position is supported by health authorities around the world, including the World Health Organization (WHO) and the Australian Radiation Protection and Nuclear Safety Agency (ARPANSA).

Mobile phone networks and other wireless telecommunications emit low-powered radio waves also known as radiofrequency (RF) electromagnetic energy (EME). This is different to ionising radiation associated with nuclear energy or use in medicine.

The radio waves which the general public is exposed to from telecommunications are not hazardous to human health.

To ensure the public remains protected, ARPANSA established limits for EME through a standard. This standard is designed to protect people from exposure to radio waves. Limits are set well below the levels where there is evidence of some biological effects such as tissue heating.

Under the Australian Communications and Media Authority's regulatory framework, all telecommunications, including new 5G technology, have to comply with the exposure limits in the ARPANSA standard.

In order to further improve understanding about this issue, the Australian Government recently announced an investment of \$9 million over four years to build public confidence in the safety of telecommunications networks, including new 5G mobile networks.

New initiatives will include additional scientific research and public education to build on existing EME safety programs.

Further information about exposure to the 5G network is available from the [ARPANSA website](#), including:
