

Australian Government

We are a Moderna COVID-19 vaccination clinic

Spikevax (Moderna) is an mRNA vaccine that can prevent people from becoming sick from COVID-19.

The Therapeutic Goods Administration (TGA) has found the vaccine meets the required standards of safety, quality and efficacy and has approved Spikevax (Moderna) for people aged 12 years and older.

Two doses given 4-6 weeks apart are needed for the vaccine to be fully effective.

Talk to your doctor to find out if Spikevax (Moderna) is right for you.
