

## Vaccine safety in Australia 2020

We actively monitor immunisation safety in Australia.

 **11,575** parents/carers responded to an SMS about their child's health a few days after their 12-month vaccinations.

**89%** reported **no** adverse events

**11%** reported any adverse event, including ...

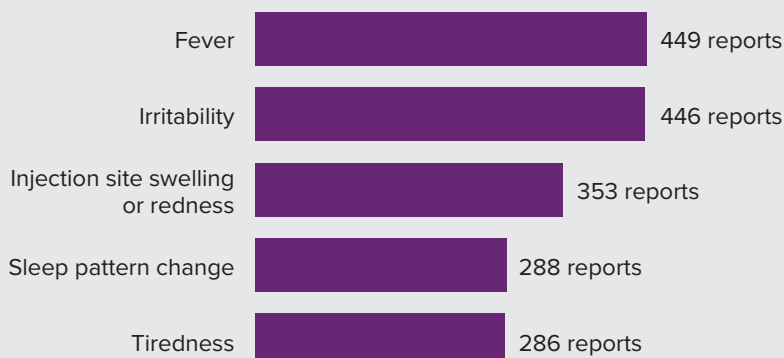

**1.1%**

who reported taking their child to a doctor or emergency department in the days after vaccination.

The adverse events they reported were similar to the types of adverse events reported overall.

**1,247** parents/carers reported one or more adverse events. The most commonly reported were:

These symptoms are known to occur after vaccination. They are generally mild and short-lived.

These symptoms are also common in young children for other reasons (such as viral infection) and **may not be related to vaccination**.

Aboriginal and Torres Strait Islander children who received these vaccines had the same rates and types of adverse events as other children.

## Vaccines given at 12 months in 2020
