# PROTECT YOURSELF...

Protect the people in your care

Vaccination is the best defence against COVID-19. It is the most effective protection against serious illness, hospitalisation or death.

When you get vaccinated, you protect yourself, the people you care for and the people who care about you.

All in-home and community aged care workers can get a priority COVID-19 vaccination now.

Find your closest vaccine provider using the COVID-19 Vaccine Clinic Finder (healthdirect.gov.au) or call the dedicated hotline 1800 020 080 (select option 4).

Don't wait. Do it now. Vaccination saves lives.

Find out more information about COVID-19 vaccinations at **www.health.gov.au/initiatives-and-programs/covid-19-vaccines**, or speak to your GP.

For interpreting services, **call 131450.**
