Footnotes for this indicator	^ New cases represent locally acquired cases and cases under investigation. With changes to mandatory quarantine requirements for international arrivals, overseas acquired cases that were not required to be in mandatory quarantine at the time of positive specimen collection are also included.		

## Traffic light classification for TTIQ raw indicators

Metric	Green	Amber	Red
Percent of PCR tests positive for SARS-CoV-2 in the past 7 days	<ul style="list-style-type: none"> <li>&lt;2%</li> </ul>	<ul style="list-style-type: none"> <li>2 to 7%</li> </ul>	<ul style="list-style-type: none"> <li>≥7%</li> </ul>

Percent of positive PCR tests notified to health department within 1 day of specimen collection in the past 7 days	<ul style="list-style-type: none"> <li>&gt;70%</li> </ul>	<ul style="list-style-type: none"> <li>60- 70%</li> </ul>	<ul style="list-style-type: none"> <li>&lt; 60%</li> </ul>
Footnotes for this indicator	& As time is measured in whole days, cases with a symptom onset up to three days prior to specimen collection are classified as being tested within two days of symptom onset. Symptom onset date was only available for a small number of NT cases in the past 7 days, so data is presented as Not Provided. # As time is measured in whole days, cases notified to health departments on the day of or one day after specimen collection are classified as notified within one day.

## New version as agreed by National Cabinet on 5 November 2021

### Data sources and additional resources

The Communicable Diseases Network Australia (CDNA) and the Australian Health Protection Principal Committee (AHPPC) have informed the traffic light thresholds in the operating picture.

Data are sourced from:

- the National Interoperable Notifiable Diseases Surveillance System (NNDSS);
- the Critical Health Resource Information System;
- aged care facility reporting;
- modelling;
- Australian Immunisation Register; and
- daily reports from state and territory health departments.

Most metrics use a rate or proportion rather than a raw number, to account for variability between state and territory populations. Due to the dynamic nature of jurisdictional daily reports and thus NINDSS data, data in this report are subject to retrospective revision and may vary from data reported in published NINDSS reports and reports of notification data by states and territories.
