Thanks Rick – so to confirm, you are saying the Department of Health are not currently recording the break down of vaccine types administered and delivered? Or you are not currently providing them?

I need the clarity for any response to media, as it seems strange to me as a former senior government health official the Federal Department of health would not know how many doses of Pfizer and Astra have been administered and delivered.

I would have thought knowing how many Astra vs Pfizer have been administered and delivered would have been specifically required to appropriately allocate the correct balance of first and second doses.

You have also not answered my question about why the weekly VOC update has not been published 72 hours later. Is this due to our enquiry?

We have asked a simple question that has taken 10 days with no answer. We know the Department has the data and we are not going to accept no for an answer.

All your responses are doing are presenting a perception that the Department is covering up the numbers or is incompetent. Eitherway, it's a poor public, policy and political outcome. So, please stop the time wasting and game playing and work with us in good faith.

We have asked specifically for the below table to be filled in. We again request you do so or you will put us in a position to escalate this outside of the Health Department if we don't receive the request data below by this afternoon. If you require an extension until tomorrow morning to provide the data, please advise, as we would prefer to work together on this matter as we have repeatedly stated from the outset. tb

Subject: RE: Request: Vaccine Surplus Breakdown [SEC=OFFICIAL]

Good Afternoon Troy,

Thank you for your question on the breakdown of COVID-19 vaccine types administered and

distributed.

Unfortunately, the Department is not currently providing reporting of specific numbers of vaccine types that have been distributed and administered, as the focus is on ensuring adequate supplies to cover the demand for both first and second doses.

This takes into account examining the gap between doses delivered and doses administered and separating to 'stock on hand' and 'wastage', and as such, we do not consider this gap to be a 'surplus'.

The previously provided estimates of 67% AstraZeneca and 33% Pfizer are applicable to the gap as doses that are supplied to providers are based on demand and eligibility for both first and second doses.

Kind regards,

Rick

Dear Lucy,

Will we be receiving a response today? It has been 10 days since our first request.

I also notice the Department is two days overdue publishing its VOC update on the website.

As the former Head of Strategy and Communications to the Federal Health Minister, I'm concerned for the Department this lack of response and failure to publish will be seen as the Federal Government – namely the Minister – either not knowing the answers to a simple question, or worse, be seen to be deliberately refusing to answer, as occurred with the aged care vaccinations in senate estimates. Particularly if we're forced to advise this position to the media. The other alternative is we're forced to ask these questions via media or political channels, but that means we can't constructively work with the department on any analysis, follow up or outcomes.

I feel we have been very generous and reasonable. Please advise today how you would like to proceed. No response will be taken as a preference for having this information requested through media and political channels.

Cheers,

tb

Ps. here is our request reposted for convenience.

To improve the speed of our request, please find the below table for convenience taken from the VOC weekly updates. If the below information is available before 26/4 then that would be appreciated. Given it's available data, I'd appreciate a response by COB tomorrow (Friday 4/6/2021)

Administered		Distributed		Released	
Pfizer	AstraZeneca	Pfizer	AstraZeneca	Pfizer	AstraZeneca

Hi Lucy,

Can I please confirm acknowledgement of our email below and whether we will be receiving the requested information this morning, given you did not meet our requested COB deadline on Friday, noting your initial response did not answer our question in good faith, hence the need for us to reframe it below.

We are happy to work constructively with you and please feel free to give me a call on 0427 063 150, noting it has been 8 days since our first request.

Cheers, tb

Subject: RE: Request: Vaccine Surplus Breakdown [SEC=OFFICIAL]

Good afternoon Troy,

As at 3rd June, the rate of administering the vaccines between the AstraZeneca and Pfizer vaccines has been, 67% AstraZeneca vaccine and 33% Pfizer vaccine. The Administration and utilisation slide on the [Department of Health website](#) provides an indicative estimate of dose utilisation across both Pfizer and AstraZeneca vaccines.

Kind regards,

Lucy S

Subject: Request: Vaccine Surplus Breakdown

REMINDER: Think before you click! This email originated from outside our organisation. Only click links or open attachments if you recognise the sender and know the content is safe.

Hello Health Media Team,

I hope this finds you well. Quick question.

On page 7 of the Dept of Health Weekly COVID update, there reports to be a

- 6.41m vaccinations made available
- 4.24m vaccinations administer
- 2.17 million surplus vaccinations

Could you please provide us with the breakdown of these numbers (or best guess estimates) of Pfizer vs AstraZeneca? <https://www.health.gov.au/sites/default/files/documents/2021/05/covid-19-vaccine-rollout-update-31-may-2021.pdf>

To help, as stated in the Dept's last VOC weekly update on 25th May:

“Last week, 352,170 doses of Pfizer and 1,019,100 doses of AstraZeneca were released. Over the coming days, the Therapeutic Goods Administration will conduct sample testing of 352,170 doses of Pfizer vaccine which arrived in Australia last night, along with another 1 million doses of AstraZeneca produced onshore by CSL, prior to releasing the vaccines for distribution.

<https://www.health.gov.au/sites/default/files/documents/2021/05/covid-19-vaccine-rollout-update-31-may-2021.pdf>

Given the above, I imagine the figures are easily accessible and at hand. A response by COB today would therefore be much appreciated. Happy to link up with someone in the Department direct if that is quicker.

Cheers,

tb
