Dear VOC,

Can we please get the actual weekly numbers for vaccinations administered between Pfizer and Astra for July – to date. You were recording them briefly in your reports, but have now moved to monthly. Example here <https://www.health.gov.au/sites/default/files/documents/2021/08/covid-19-vaccine-rollout-update-30-august-2021.pdf>. If it's easier to send daily numbers in a spreadsheet, then that is fine.

Also we note that after strong growth in vaccination rates (congratulations) they are starting to stagnate based on the 7 day average. This is at the same time sentiment seems to be on the increase based on your research. Are you able to shed any light on this and whether you expect daily/weekly vax rates to grow much further, or this is the peak.

Deadline COB tomorrow please.

Cheers,

tb
