3. Background

This product was first listed on the Scheme Schedule on 21 November 2011.

4. Clinical Place for the Product

Not Applicable.

Financial Analysis

The deletion of the entire product range is recommended. It is therefore, unlikely that there would be budgetary impact for the Scheme as a consequence of deleting this product as alternate products at the benchmark price are listed on the Schedule.

5. Panel Recommendation

The Panel recommended the deletion of entire product range of Coloplast SenSura Mio (SAS Code 5697W) in subgroup 1(b) of the Scheme Schedule at the unit price of \$2.735, with a maximum monthly quantity of 90 units.

The Panel also noted that Coloplast is to advise Stoma Associations, ostomates, Stomal Therapy Nurses and ACSA of the deletion. A period of approximately six months from the date of the Panel's recommendation (12 October 2021) should be given to allow users of the product to seek a suitable alternative and to enable Stoma Associations to manage their stock levels.

6. Context for Decision

The Panel helps decide whether stoma products should be subsidised and, if so, the conditions of their subsidisation in Australia. It considers submissions in this context.

A Panel decision not to recommend listing or changes to a listing does not represent a final Panel view about the merits of a particular stoma product. A company can resubmit to the Panel following a decision not to recommend listing or changes to a listing. The Panel is an advisory committee and as such its recommendations are non-binding on Government. All Panel recommendations are subject to Cabinet/Ministerial approval.

7. Applicant's Comment

Coloplast agrees with the SPAP's recommendation.
