Traffic light classification for case rates and thresholds

| Metric | Green | Amber | Red |
|---|--|--|--|
| New cases per 100,000 population in the past 14 days | <ul style="list-style-type: none">Rate only to be presented with no colourThe indicator needs to be considered alongside clinical capacity which if predicted to be compromised<ul style="list-style-type: none">Low <20 new cases per 100,000 in the past 14 daysMedium 20 to 100 new cases per 100,000 in the past 14 daysHigh >100 new cases per 100,000 in the past 14 days | | |
| New cases in regional and remote areas per 100,000 regional and remote areas population in the past 14 days | <ul style="list-style-type: none">Green<20 new cases per 100,000 in the past 14 days | <ul style="list-style-type: none">Amber20 - 100 new cases per 100,000 in the past 14 days | <ul style="list-style-type: none">Red>100 new cases per 100,000 in the past 14 days |
| New cases in Aboriginal and Torres Strait Islander people per 100,000 in Aboriginal and Torres Strait Islander population in the past 14 days | <ul style="list-style-type: none">Green<20 new cases per 100,000 in the past 14 days | <ul style="list-style-type: none">Amber20 - 100 new cases per 100,000 in the past 14 days | <ul style="list-style-type: none">Red<ul style="list-style-type: none">>100 new cases per 100,000 in the past 14 days |
| Footnotes for this indicator | ^ New cases represent locally acquired cases and cases under investigation. With changes to mandatory quarantine requirements for international arrivals, overseas acquired cases that were not required to be in mandatory quarantine at the time of positive specimen collection are also included. | | |

Traffic light classification for TTIQ raw indicators

| Metric | Green | Amber | Red |
|--|--|---|--|
| Percent of PCR tests positive for SARS-CoV-2 in the past 7 days | <ul style="list-style-type: none"><2% | <ul style="list-style-type: none">2 to 7% | <ul style="list-style-type: none">≥7% |
| Mean PCR tests per 1,000 population per day in the past 7 days | Recommended to be Grey (as per current COP) | | |
| Percent of symptomatic cases PCR tested within 2 days of symptom onset in the past 7 days – | <ul style="list-style-type: none">>70% | <ul style="list-style-type: none">60- 70% | <ul style="list-style-type: none">< 60% |
| Percent of positive PCR tests notified to health department within 1 day of specimen collection in the past 7 days | <ul style="list-style-type: none">>70% | <ul style="list-style-type: none">60- 70% | <ul style="list-style-type: none">< 60% |
| Footnotes for this indicator | & As time is measured in whole days, cases with a symptom onset up to three days prior to specimen collection are classified as being tested within two days of symptom onset. ¹ This indicator cannot be reliably reported as the data quality of the fields in the NINDSS used to calculate this indicator has reduced considerably across all jurisdictions. # As time is measured in whole days, cases notified to health departments on the day of or one day after specimen collection are classified as notified within one day. | | |

Traffic light classification for modelled epidemic activity

| Metric | Thresholds |
|--|--|
| Reff - effective reproductive number | Grey (unless clinical capacity is predicted to be compromised threshold TBA) |
| Final state-wide transmission potential (TP) for SARS-CoV-2 Delta variant of concern incorporating current settings, behaviours, vaccination levels and TTIQ | Grey (unless clinical capacity is predicted to be compromised threshold TBA) NOT yet adjusted by TTIQ. |
| Percent of TP reduced through vaccination | Grey |
| Percent of TP reduced through TTIQ | Grey |

Traffic light classification for outbreak indicators

| Metric | Green | Amber | Red |
|---|--|---|---|
| Number of cases reported in residents in RACFs in the past 7 days (c.f. week prior) | <ul style="list-style-type: none">Zero | <ul style="list-style-type: none">N/A | <ul style="list-style-type: none">≥ 1 case in residents |

New version as agreed by National Cabinet on 5 November 2021

Data sources and additional resources

The Communicable Diseases Network Australia (CDNA) and the Australian Health Protection Principal Committee (AHPPC) have informed the traffic light thresholds in the operating picture.

Data are sourced from:

- the National Interoperable Notifiable Diseases Surveillance System (NNDSS);
- the Critical Health Resource Information System;
- aged care facility reporting;
- modelling;
- Australian Immunisation Register; and
- daily reports from state and territory health departments.

Most metrics use a rate or proportion rather than a raw number, to account for variability between state and territory populations. Due to the dynamic nature of jurisdictional daily reports and thus NINDSS data, data in this report are subject to retrospective revision and may vary from data reported in published NINDSS reports and reports of notification data by states and territories.
