Data presented are as at 22 Feb 2022

Data is based on Notifications to NINDSS only, and is not inclusive of cases determined by rapid antigen test (RAT)
 Estimates presented are as at 2 February 2022, based on case data extracted on 15 February 2022

<sup>3.</sup> Estimates presented are as at 14 February 2022

 <sup>4.</sup> Clinical capacity indicators refer to use of clinical resources and staff and should not be used to indicate severity of illness. Values may not align exactly with other jurisdictional reporting on related metrics.
 5. From 21 January 2022, data is based on data reported to the NDIS Commission by registered NDIS providers and should be considered indicative and subject to change.
 6. Some changes in cumulative totals have presented as negative due to further investigation and reclassification of outbreaks from case managers.

Number and percent of SA4 regions above 80% fully vaccinated (c.f. week prior)	• 100%	<100% and Increase from previous week	<100% and no change from previous week

## New version as agreed by National Cabinet on 5 November 2021

#### Data sources and additional resources

The Communicable Diseases Network Australia (CDNA) and the Australian Health Protection Principal Committee (AHPPC) have informed the traffic light thresholds in the operating picture.

Data are sourced from:

- · the National Interoperable Notifiable Diseases Surveillance System (NNDSS);
- the Critical Health Resource Information System;
- · aged care facility reporting;
- modelling;
- Australian Immunisation Register; and
- · daily reports from state and territory health departments.

Most metrics use a rate or proportion rather than a raw number, to account for variability between state and territory populations. Due to the dynamic nature of jurisdictional daily reports and thus NINDSS data, data in this report are subject to retrospective revision and may vary from data reported in published NINDSS reports and reports of notification data by states and territories.
