

Notes

- All data are based on influenza vaccinations ('episodes') reported to the Australian Immunisation Register (AIR) as at COB 16 January 2022.
- Note that vaccinations reported to the AIR are substantially more comprehensive and correct in the most recent years (i.e. the relatively small number of flu vaccinations reported to the AIR in earlier years do not accurately reflect the number of flu vaccinations actually given in Australia in those years).
- The Australian Childhood Immunisation Register (ACIR) preceded the AIR and it only included children under the age of seven years until 2016. In January 2016 the ACIR was expanded to include people up to the age of 20, and in October 2016 the register became a 'whole of life' register, accepting vaccination records for people of all ages.
- It became mandatory for recognised vaccination providers to report influenza vaccinations given in Australia to the AIR on 1 March 2021.
- Vaccinations where the person has since been 'End dated' in the Medicare Consumer Directory (due to death, emigration, etc) are included in the data.
- Data include influenza vaccinations given to Medicare eligible and non-Medicare eligible individuals.
- Persons with 'Unknown' jurisdiction are individuals who do not have address details reported to AIR.
- Persons with 'Non-binary / Unknown' sex are individuals who selected neither Male nor Female on their Medicare Registration.
