

QUESTION

Why should I get a COVID-19 vaccine booster dose?

ANSWER

- COVID-19 vaccines protect you, your family and community from getting very sick or dying from COVID-19.
- The protection provided from your primary course will decrease over time.
- A booster will give you stronger and longer lasting protection against COVID-19.
- You need a booster to stay up-to-date with your COVID-19 vaccines.

To book your booster, visit the Vaccine Clinic Finder at www.australia.gov.au.

For more information, call the National Coronavirus Helpline on **1800 020 080**. For interpreting services, select **option 8**.
