# Doses at equivalent stages of rollout (Day 377)

Data as at:  
06 Mar 2022

The x-axis is truncated at the length of Australia's vaccination program. Countries with intermittent reporting have had their doses per 100 imputed to Australia's current stage of rollout. Israel excluded as it is beyond scale of the graph

Cumulative doses administered (06 Mar): **54,580,411**

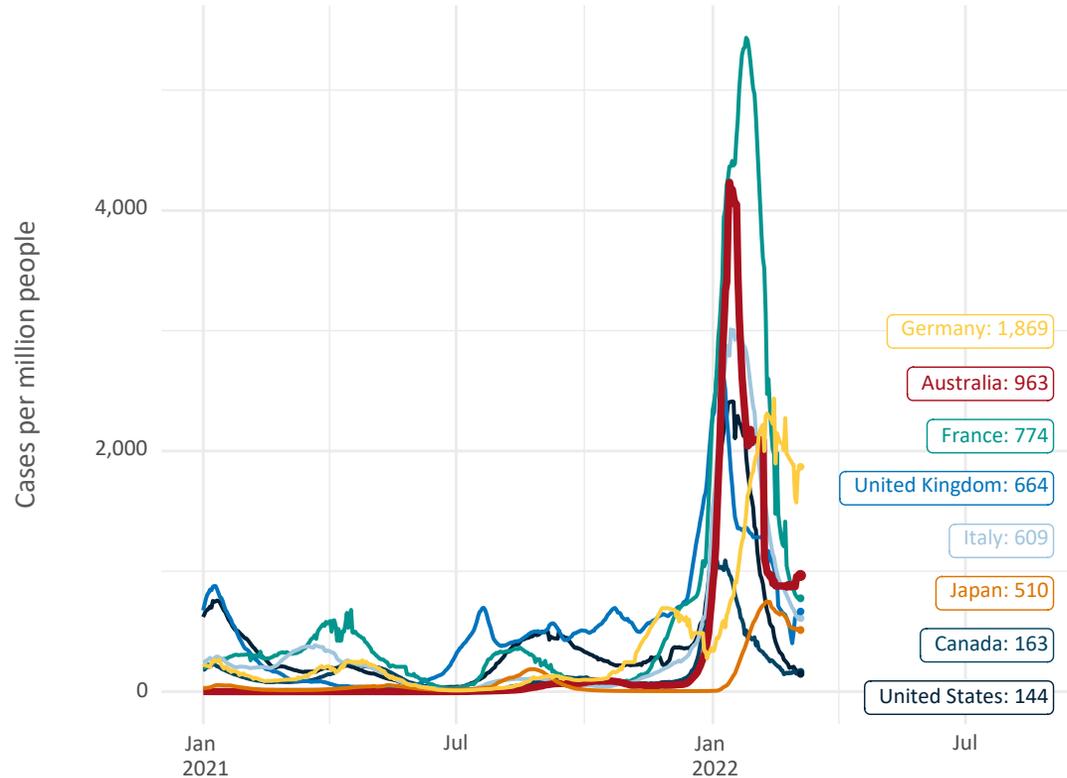

Note: From 11 January 2022, data for Australia includes all doses administered to people 5 and over. Prior to 11 January, data was for 12 and over.

### About this data

- Ordered – Total doses delivered to sites. Based on logistics provider data. This figure includes doses allocated for administration in the coming week.
- Available – total doses that could have been administered to date, less doses re-distributed from States & Territories to Primary Care or Aged Care & Disability (i.e., does not include those deliveries recently received, and intended for use in the coming week).
- Administered – Doses administered as at 6 March 2022.
- Stock on Hand at Sites – Available doses minus Administered doses and a small % wastage.
- The dose utilisation is calculated based on the total doses administered and a small % wastage in line with international standards in relation to total available doses.
- For Aged Care & Disability, the doses available for administration is for the full period (up to 6 March 2022).
- Aged Care & Disability utilisation is not provided as the in-reach rollout is demand-based, with vaccines ordered based on resident numbers.
