Proof of employment for in-home and community aged care workers

In-home and community aged care workers are a priority group for COVID-19 vaccination. All vaccine providers are requested to provide them priority access.

All primary care clinics, including general practices and pharmacies, are requested to make vaccination appointments **within 7 days** of a request.

The Australian Government strongly encourages in-home and community aged care workers to receive a booster COVID-19 vaccine as quickly and safely as possible.

In-home and community aged care workers are required to be up to date with their COVID-19 vaccinations in a number of states and territories. State and territory public health orders define who must be vaccinated and by when, whether a primary course only or booster dose is mandatory, and limited exemptions that may apply.

This document confirms proof of employment for in-home or community aged care workers as a priority group for COVID-19 vaccination.
