4. Background

This product was first listed on the SAS Schedule on 1 September 2018.

5. Clinical Place for the Product

Not applicable.

6. Financial Analysis

Substitute products are currently listed in subgroup 1(b) of the SAS Schedule at the same cost and maximum monthly quantity. It is therefore unlikely that there would be any budgetary impact for the SAS as a consequence of deleting this product.

7. Panel Recommendation

The Panel, noting equivalent products remained on the Schedule recommended the deletion of the entire product range for Omnigon Eakin Dot (SAS Code 80175R) listed in subgroup 1(b) of the SAS Schedule at the unit price of \$2.735 with a maximum monthly quantity of 90 units.

The Panel also noted that sponsors are usually required to advise Stoma Associations, ostomates, Stomal Therapy Nurses and ACSA of a deletion with a period of approximately six months from the Panel recommended date to allow users of the product to seek a suitable alternative and to enable Stoma Associations to manage their stock levels. In this case the notification is not required as the product has never been manufactured.

8. Context for Recommendation

The Panel provides advice on whether stoma products should be subsidised and, if so, the conditions of their subsidisation in Australia. Applications are considered in this context. Panel advice not to recommend listing or changes to a listing does not represent a final Panel view about the merits of a particular stoma product. A company can resubmit to the Panel following advice not to recommend listing or changes to a listing. The Panel is an advisory committee and as such its recommendations are non-binding on Government. All Panel recommendations are subject to Cabinet/Ministerial approval.

9. Applicant's Comment

The applicant noted the SPAP recommendation.
