Data presented are as at 9 August 2022

1. Data is based on Notifications to NINDSS only, and is not inclusive of cases determined by rapid antigen test (RAT)

2. Estimates presented are as at 22 July 2022, indicative cases from 13 July to 26 July 2022 inform the estimate presented

3. TP calculated for the Omicron BA.4/5 subvariants based off assumption of 50% case ascertainment. Estimates presented are as at 12 July 2022

4. From 28 February 2022 the Commonwealth Government's collection methodology has changed from Case Manager input to aged care provider service self-reporting via the My Aged Care portal. This is likely to result in greater clarity regarding classification of outbreaks and case numbers which will impact on reported figures.

5. Clinical capacity indicators refer to use of clinical resources and staff and should not be used to indicate severity of illness. Values may not align exactly with other jurisdictional reporting on related metrics.

6. From 21 January 2022, data is based on data reported to the NDIS Commission by registered NDIS providers and should be considered indicative and subject to change.

This did not impact notification to the affected individuals and has since been rectified.

New version as agreed by National Cabinet on 5 November 2021

Data sources and additional resources

The Communicable Diseases Network Australia (CDNA) and the Australian Health Protection Principal Committee (AHPPC) have informed the traffic light thresholds in the operating picture.

Data are sourced from:

- the National Interoperable Notifiable Diseases Surveillance System (NNDSS);
- the Critical Health Resource Information System;
- aged care facility reporting;
- modelling;
- Australian Immunisation Register; and
- daily reports from state and territory health departments.

Most metrics use a rate or proportion rather than a raw number, to account for variability between state and territory populations. Due to the dynamic nature of jurisdictional daily reports and thus NINDSS data, data in this report are subject to retrospective revision and may vary from data reported in published NINDSS reports and reports of notification data by states and territories.
