- API: Co-Design: Pain Points & Priorities
- Q&A / Next Steps

Discussion Highlights

State of Play

- Recap:
 - Operating principles, probity considerations, IP assumptions, and collaboration logistics
 - Recap: Co-design approach
 - Recap: Group progress to date

Quarterly Financial Reporting (QFR): Interface Playback

- Overview: QFR
 - Phase 1 – Quarterly Financial Reporting built on the existing ACFR (Aged Care Financial Reporting) platform as a short-term solution
 - Phase 2 – Minimal viable product (MVP) on the GPMS (Government Provider Management System) Salesforce platform as a longer-term solution
 - Previewed – Summary of UX research findings

API: Co-Design: Authentication Credentials

- Workshopped: The use of authentication credentials via an interactive Miro session

API: Co-Design: Pain Points & Priorities for API development

- Feedback: Two new quality indicators
 - Quality of Life
 - Consumer Experience

Key Outcomes & Actions

- REMINDER: QFR & B2G activities - details on the Sector Partners site
- ACTION: As a reminder, we are still very keen to hear about
 - How would you prioritise API development?
 - Which APIs would give you the most benefit?
 - What is your current data sharing & reporting pain points?
